Super user Side – Create an App

System Management > Generators > Applications > Application Generator

- When the App is ready, use the direct activation 'Send Link to App' to send to users or emails

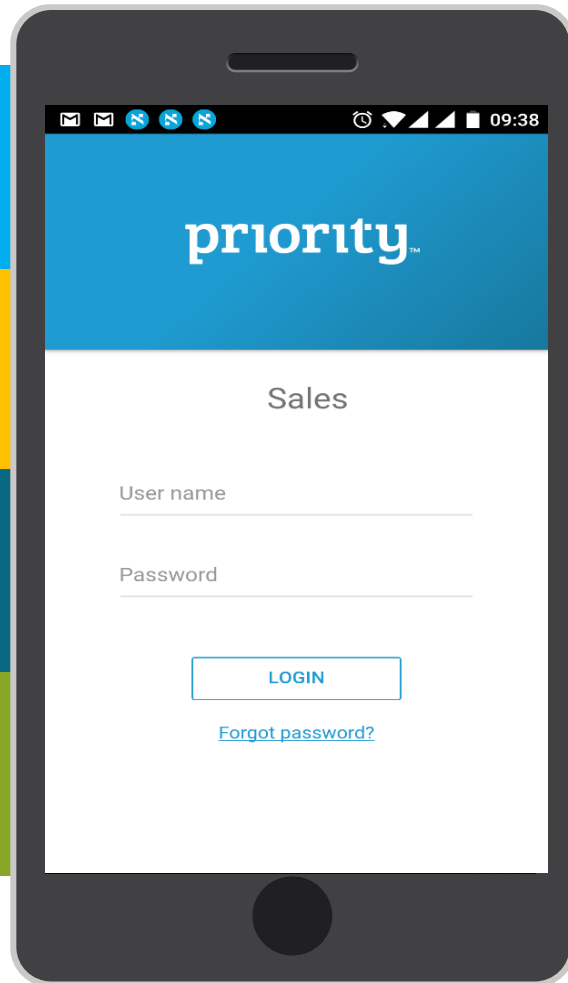

A dialog box titled "Target" with a close button (X) in the top right corner. It contains two radio button options: "To Users" (unselected) and "To E-mail Address" (selected). At the bottom, there are three buttons: "OK" (highlighted in blue), "Cancel", and "Help".

- When making a change to the App, use 'Refresh Application' to send an automatic update.

Users

Install 'Priority Master' (App store)

Open the app and click on 'Scan'

Scan the barcode from the email

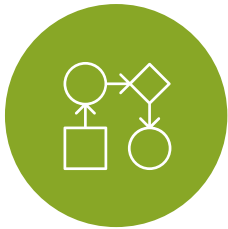

Log in and start working

Important Information

From version 18 up

Requires special licence (API)

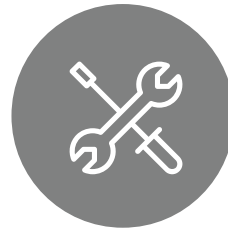

Standard look and feel

Currently only works with forms
(no reports, Direct activations,
label printing etc.)

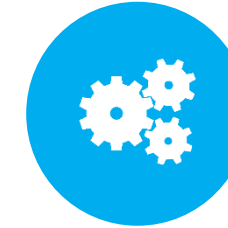

As default, the form will show all records,
so it is recommended to create a
default query to limit the initial search

Same user can be logged in
simultaneously on many devices
(up to 5)

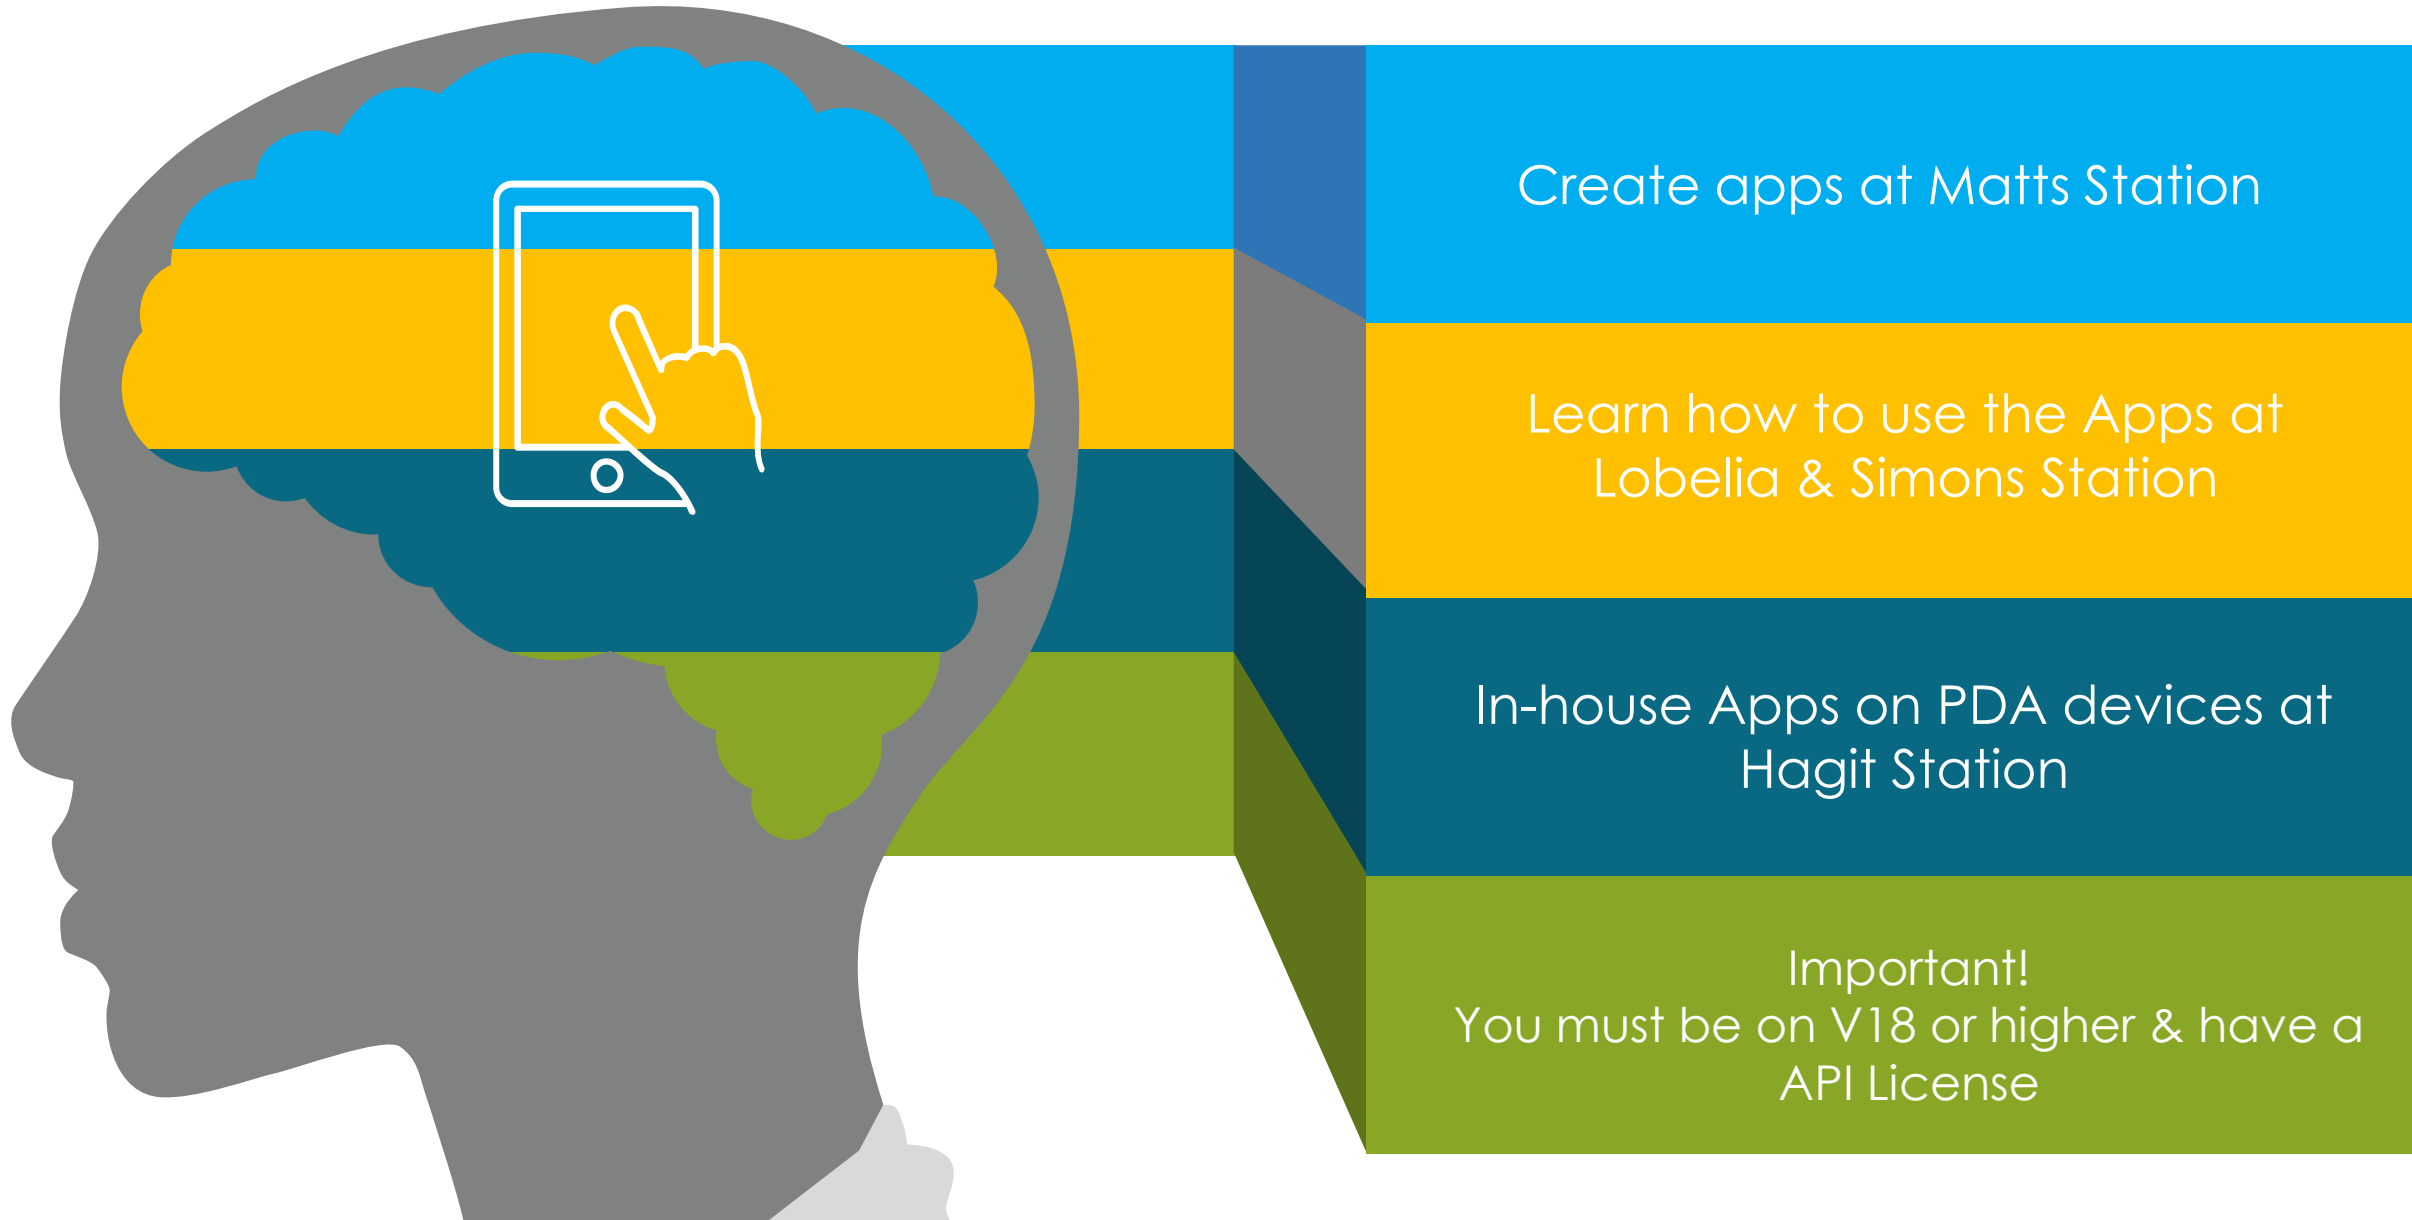

Can attach pictures taken by phone

Requires Internet access to work

Hands On Demo!

MEDATECH

To use the app

Scan the QR codes on the tables

Deliveries

Sales

Service
Engineers

Shopfloor

Warehouse

Use the Credentials on the tables to log in & play
