Send to excel

Hotkeys

Hot keys designed to make the navigation within Priority forms and menus easier and more user friendly

Priority Talk

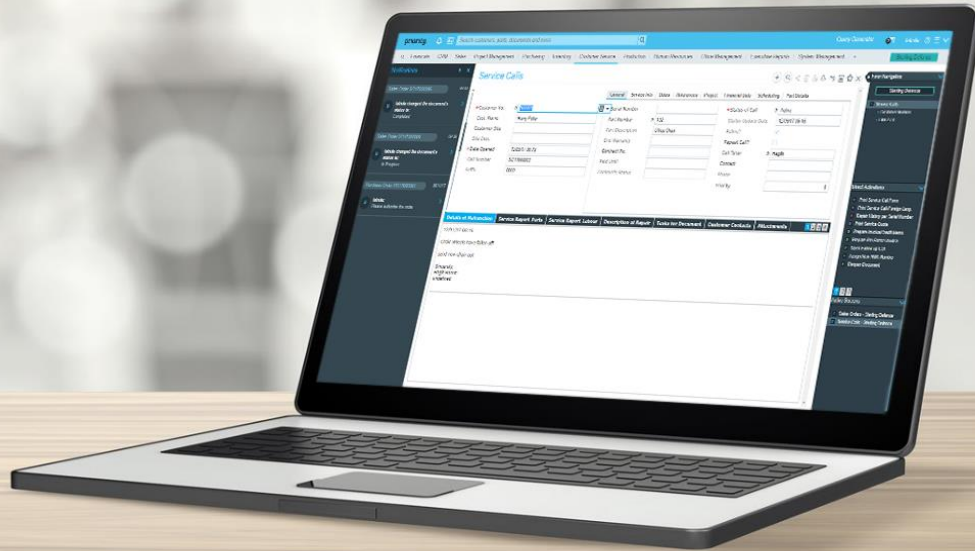

- A way of flagging specific documents for yourself and or colleagues.
- Recognizable IM format.
- Simple and straight forward.
- Available across numerous forms.
- Users notified as soon as they log into the system.
- Notification shown no matter which form is open

Advantages

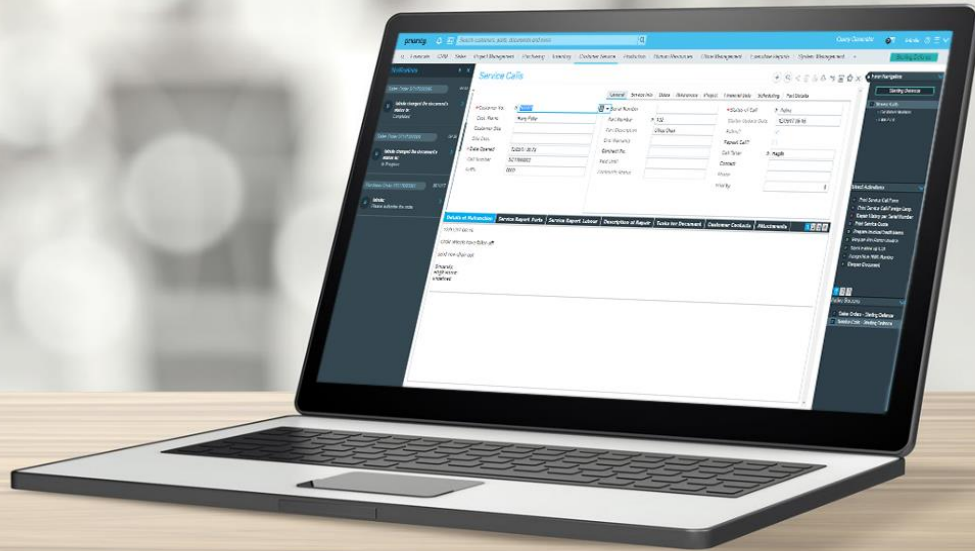

- Flag a specific document for easy access for yourself and or others.
- All information will be recorded straight into the internal comments of the document.
- Multiple people can be added at the start or during the conversation

Report Search's

You can drill down into the parameter inputs for search's to refine them further

Send to excel

The simple send to excel functionality is a powerful tool for quick data changes
